**NOTICE TO THE PUBLIC – CONSTRUCTION PROGRESS: Wood Duck Boat Launch Dredging Project**

The 2026 Wood Duck Boat Launch Dredging Project, undertaken to restore navigable depths and improve shoreline protection, is nearing completion. Controlled refilling of the boat launch area is scheduled to begin on **Monday, March 23, 2026**.

The boat launch will remain closed to public access following the refill due to safety hazards associated with open water and unstable or thin ice conditions. All existing signage and barricades will remain in place.

**There will continue to be no public access through the project site**, including:

- Access to and from the Lee River
- Access to the walking trail within the project area

Final site clean-up activities are anticipated to take place in April and May 2026.

The Municipality appreciates the public's patience and cooperation as these important improvements are completed.

Sincerely,

Karina Humniski  
Director of Public Works
