

RM to begin culvert and drainage repair work on Wendigo Road beginning week of Oct. 6

Stay up to date with RM of Lac du Bonnet news.

Sept. 25, 2025: The Rural Municipality of Lac du Bonnet will begin work the week of Oct. 6 to repair culverts and drainage along a 2.5 kilometre section of Wendigo Rd. that was damaged during the wildfire response. The work is expected to take up to three weeks.

This damage has compromised the proper flow of water, increasing the risk of overland flooding during the spring snowmelt. Left unaddressed, this could render sections of road impassable and lead to further deterioration of RM road infrastructure. These repairs are being completed to mitigate future risk and ensure the roadway's continued safety and accessibility.

The work will include reshaping drainage ditches and roadside slopes to restore them to their original conditions and replacing nine existing culverts that were damaged during the wildfire response.

Traffic signage will be in place and road access will be maintained during the duration of work except during culvert replacements, which may result in temporary interruptions to access. We ask for residents' cooperation in adhering to any closure signage during the duration of the project.
